AI-Powered

Complete Features

Every benefit and every feature of Integra for Education, area by area.

BENEFITS

What your institution gains with Integra

One connected platform for schools, colleges, universities and training institutes. Here is what changes for management, office staff, teachers, students and parents.

One record for every student

From the first enquiry to the alumni list, admissions, attendance, fees, marks and certificates stay on one student record.

Fees that post themselves

Every fee receipt flows into receivables and the general ledger, so the accounts team never re-keys a payment.

More time for teaching

Attendance, homework, marks and report cards are captured once, so teachers spend less time on paperwork.

Parents always informed

Fee reminders, attendance alerts, results and circulars reach parents by app, SMS, WhatsApp, email or voice.

Every branch in one view

Run many campuses, boards and institutions on one platform, with consolidated reports for management.

Decisions on live data

Dashboards for admissions, collections, attendance and results, with reports by class, term and branch.

AI that saves time

Ask questions in plain language, generate timetables and get early warnings. AI suggests, people decide.

Secure by design

Role-based access, approvals and a full audit trail. Each person sees only what their role allows.

Any device

Web and mobile apps for staff, students and parents. Mobile attendance keeps working without a network.

Grows with you

Start with the modules you need today and switch on more as your institution grows, without changing systems.
