Why Integra

Many finance teams keep books in one package, budgets in spreadsheets and reconciliations on paper. Integra puts them on one ledger connected to sales, purchase, payroll and stock, so the numbers are right the first time.

From scattered books to one connected ledger

Without Integra	With Integra Finance Suite
– Sales, purchases and payroll re-keyed into accounts	✓ Every transaction posts to the ledger automatically
– Bank reconciliation done line by line	✓ Statements imported and matched automatically
– Customer dues chased from memory	✓ Statements, reminders and payment links
– Budgets checked after the money is spent	✓ Budget checks before bills are approved
– Month-end close takes weeks	✓ A close checklist with period locks and accruals
– Group accounts built in spreadsheets	✓ Intercompany and consolidation on one platform
– Entries edited or deleted without a trace	✓ An audit ledger where nothing is ever deleted

The solution

Integra Finance Suite is the one engine that posts accounting for the whole platform. Sales, purchase, stock, payroll and every industry pack post to it, so finance never re-keys a transaction.
